KEYNOTE ADDRESS

EMF & Childhood Leukemia: Current Research

Wednesday, February 21, 2007

9:45am - 10:45am

Free to All Attendees

By Robert Kavet, ScD, EMF-RF Program Manager, EPRI

While most studies have shown no links between electromagnetic fields (EMF) and a variety of maladies, several key epidemiological studies have caused experts to correlate a statistically significant association between power-frequency magnetic fields and childhood leukemia. Hear two theories that may clarify the issue, one involving basic residential grounding as required by the NEC®.

GENERAL SESSION
